

DRAGON COLUMN ENGRAVING MACHINE (SINGLE-HEAD BODY) 龙柱雕刻机 (单头一体)

Product Introduction

Performance characteristics

1. The latest system, efficient and stable
2. X, Y axis 30 rails, Y axis double rails
3. XY reducer drive, Z-axis with brake function
4. Can process round carving, plane carving, flexible and changeable, round carvings can carry large workpieces of more than 5 tons
5. The saw blade is roughened first, and then the engraving process is carried out, which is efficient and energy-saving
6. Suitable for large-scale pillar processing such as building materials, ancient building, gardens, etc

Technical Parameters

Technical parameters

Equipment model	CSL-120300-1
Dimensions	2200x5500x3000mm
Processing size	φ1200x3000mm
Saw power	11KW
Spindle power	7.5KW
Drive system	Servo
Control system	NC studio / RichAuto (Customizable)

Processing
