Specifications:

[Ati-Blue] Filter 90% wavelength of blue light from 380nm~420nm, to avoid myopia, protect your eyes

[Radiation-proof] prevent ultraviolet and infrared from your mobile phone

[9H Hardness & Bubble Free] The privacy screen protector is made of 9H tempered glass, providing shatterproof protection from high impact damage. When self-bonding to the screen, the screen protector will automatically release air bubbles.

[Full Coverage] Precisely cut, covering the entire flat surface and the rounded edges of the phone, leaving the earphone speaker, camera and light sensor completely unobstructed.

[Oleophobic coating & High Sensitivity] This Privacy Screen Protector is coated with an oleophobic layer, which is oil and water resistant and has a smooth surface that protects your iPad from scratches, cracks, and dirt, allowing you to experience hassle-free fingerprints sensing and touch.

[Easy installation, no bubbles] The protective film comes with a silicone positioning glue design, which is rather easy for consumers to apply.
