

- **Whole Transparency**

The Tempered Glass is 0.4mm, 0.3mm and 0.2mm thickness and made with chemically treated transparent tempered glass. Brake protection and sock resistance.

- **Surface Hardness: 8-9H**

The surface of the tempered glass has a hardness of 8-9H, three times stronger than regular PET film. Even hard objects such as knives and keys will not scratch this product.

- **Oleophobic Coating**

The Tempered Glass has an oleophobic coating that prevents fingerprints and other contaminants and makes the film easy to clean.

- **Delicate Touch**

The Tempered Glass is coated on the back with a strong silicon adhesive that makes installation easy and attaches the film firmly so as to not affect the touch screen's sensitivity.

- **Anti-Shatter Film**

If broken. The tempered Glass breaks into small pieces that are not sharp, making it safer than other glass products.
