

In 1990, the company Ashadeep Engineering was started as a proprietor firm. Initially they manufactured all types of equipments. Gradually with their innovations they developed certain specialties in some of equipments such as Ultrafine Pulverizer.

Later, in 2001 they formed another company, Ultra Febtech Pvt. Ltd. This was done to make a new identity, to work in organized way. Ultra Febtech Pvt. Ltd. has been renowned in the design and manufacture of size reduction (grinding), mixing and gradation equipments. Since its inception Ultra Febtech has had one overriding commitment: to provide personalized creative engineering service to the customers. The features of their products, the depth of their technical knowledge and wealth of experience available with them provide the most effective equipments to the customers. Ultra Febtech Pvt. Ltd. has made a team of various technical people having expertise in various fields. These people are working as associates of Ultra Febtech Pvt. Ltd. The company believes in development & progress, hence they continue their efforts for betterment.

Guar gum and textile printing gum industry became their special field to supply them equipments since the ultrafine grinders were best suited for such industry.

Ultra Febtech Pvt. Ltd also undertakes turnkey plants for guar Gum powder, tamarind kernel powder (TKP), Carboxy Methyl Cellulose (CMC), MCA, CMS, guar/TKP derivative plants. Ultrafine Pulverizer (grinder) is the one for what they have gathered expertise over decade. Number of equipments have been supplied to all over the country for the various applications and those include ribbon blenders, ultra fine grinders, various screening machines, conveying systems & others.

Total customer satisfaction is the motto of the company. They believe in long association and business relationship with their customers, and constantly remain in touch with the customers for their changing needs. The customer feedback and their demand for newer things inspire them to upgrade their equipments. They are always enthusiastic to meet customers' changing needs that result in innovation.

They are catering the Indian clients regularly and now since 2004, they have stepped in to global market. They have started with one of their customers in Iran and they had completed a repeat order for the same. They believe in quality and a long-term trouble free performance hence, they have got loyal clientele.

The Company:

It is situated in the Industrial zone of Vatva GIDC, Ahmedabad. It has a big shade. It has a well-equipped workshop having different sizes of Lathes, Bench Grinder, Normal as well as Radial types of Drilling Machines, Shaping Machine, Bending Machine, Welding machines, Argon welding Machine and various range of hand-grinders and tools. It has an open area for large fabrication jobs. A manual Crain is also installed for easy movement of the heavy jobs.

The equipment manufactured by Ultra Febtech Pvt. Ltd.

Size Reduction (Grinding)	Ultra fine Grinder	Dry Fine Grinding
	Ultra Air Classifier Mill	Dry Fine Grinding
	Ball Mill	Wet Fine Grinding
	Hammer Mill	Fine & Coarser Grinding
	Ultra Impact Mill	Dry Fine Grinding
	Flaker	Flaking
	Cracker	Cracking
	Pin Mill	Coarser Grinding
	Impact Pulverizer	Dry Fine Grinding
Gradation Machinery	Centrifugal Siever	
	Vibro Screen	
	Rotary Siever	
	Eccentrics Siever	
Mixing Machinery	Ribbon blender (U & Conical Type)	
	Reactors (Vertical & Horizontal with Stirrer)	
	Nauta mixer (Screw Type)	
	Plough shear mixer	
	Double cone mixer	
	Continuous Paddle mixer	
Conveying System	Pneumatic conveying	
	Screw Conveyor	
	Bucket elevators	
	Blowers	
	Rotary Air Lock Valve	
	Turn Table Rotary Feeder	
Others Equipment	Tray Dryer	
	Rotary Dryer	
	Silo, Hopper, Storage Tanks, Vessels	
	Cleaning - system	
	Washing -system
