

1.Product Introduction:

BT60 Battery Analyzer apply for all 6V, 12V, 24V Car battery, Motorcycle battery and Truck battery.

It can effectively analyze and read important car datas, such as voltage,internal resistance, cold cranking, battery health and charging status ect. It can help to find the battery problem quickly and accurately, thus can achieve quick vehicle repair.

Test battery include Regular Flooded battery, AGM Flat plate battery, AGM Spiral battery, GEL battery and EFB battery etc.

It support multi-languages, you can Find Tool Setup, then select the language you like.

2.Technical Parameters

Voltage Measurement Range: 5-36V
