| Recycled Series: |                     |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |            |                         |                         |             |           |         |           |                                              |                                                   |
| TKCB-173         | Type-C to Lightning |  | 1. 30,000 times bend lifespan with braiding<br>2. Premium mixed white & black cotton braided, Belkin style<br>3. Support PD charging function, suitable for iPhone 8-12 Pro Max. 30 mins to fast charge 50% battery<br>4. Connect USB C chargers to power iOS devices<br>5. PD Charge range: 5V 2.4A/ 9V 2.22A/12V 1.67A/ 15V 2A/ 20V 3A<br>6. Built-in metal shield on both tips for max durability<br>7. Customized molding & braiding styles available upon request<br>8. USB-IF compatible specifications for voltage, current, size etc. (We are USB-IF member)<br>9. Max 3m long for flexible use in different occasions (home, office, coffee house etc.) | Charge & Sync | C to L     | 5V/9V/12V /15V (20VMax) | 5V/9V/12V /15V (20VMax) | 3.0 A (Max) | PD 60W    | 30K     | 50 KG     | Yes                                          | 5                                                 |
