What io[®] WiFi LED Strip can do

Brightness

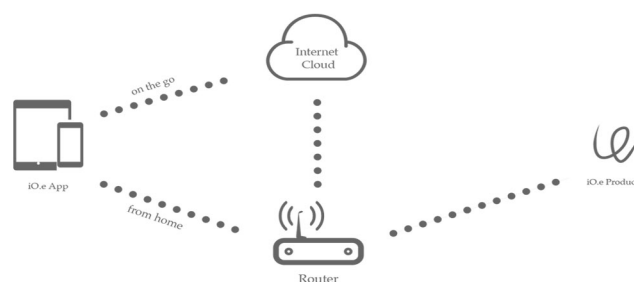

Steplessly set your desired brightness with wiping movements on the display. Individual setting for each lamp or luminaire or according to personally set groups.

Light color

Steplessly set your desired light color from the complete RGB spectrum with wiping movements on the display. Individual setting for each lamp or luminaire or according to personally set groups.

Color temperature

Do you prefer bright, invigorating white or cozy, warm white? Steplessly select your desired color temperature with wiping movements on the display. Individual setting for each lamp or luminaire or according to personally set groups.

Mobile App now available at  iOS &  Android
