

X2 – fragrance diffuser

Model: X2

Rated voltage: DC 5V

Power: 3W

Capacity: 100ml

Oil consumption: 0.6ml/h

Net weight: 0.6kg

Applicable space: $\leq 80\text{m}^2$

Size: W150*D60*H180

Features:

- Patent atomization, nano-level atomization technology
- Cold fragrance atomization, diffused fragrance pure natural
- Intelligent timing, three-stage intelligent time control
- Built-in fan, high quality hydraulic assisted spread
- Concentration adjustment, free control of spray stop time
- Infrared remote control, convenient for maintenance and debugging

Article	X2-fragrance diffuser	Traditional diffuser	Similar product
Appearance			
Material	Environmentally friendly,corrosion-resistant modified materials	ABS Plastic	ABS Plastic
Mist Method	Patent atomization technology	Press release	Direct injection atomization
Oil Consumption	0.6ml/h (continuous scent)	10ml/h	1.5ml/h (continuous scent)
Annual Oil consumption	1 bottle(500ml/bottle)	36 Bottle (500ml/bottle)	4 Bottle (500ml/bottle)
Power Supply	DV 5V/4 or Four-section five-cell battery	Two-section five-cell battery	DV 12V
Atomization Effect	Smokey(90% atomized particle within 1-5 micron), long fragrance time, scent comfortable	Water spray(most atomized particle in 200-300micron)fast local diffuse fragrance, short in flowing, cause fluid on the ground	Water spray(most atomized particle in 200-300micron)fast local diffuse fragrance, short in flowing, cause fluid on the ground
Adjustment Method	Infrared remote control	Host button adjustment	Host button adjustment

Wall Mounting	Punch-free direct paste installation	Destruction wall punching installation	Destruction wall punching installation
Battery Life	18 Months	1 Year	6 Months
Nozzle	Not Blocked	Blocked	Blocked

X1-fragrance diffuser

Model: X1

Size: $\Phi 75 \times 158 \text{mm}$

Power: 5V

Rated: 2W

Volume: 15dB

Oil consumption: 0-0.25ml/H(Adjustable)

Weight: 0.8kg

Capacity: 100ml

Applicable: $\leq 60 \text{m}^2$

The Advantages of MANXN-X1:

- ◆ Power exchange to ensure easy use
- ◆ Highly nano-sized, no dripping

- ◆ The communication space is broad and the diffusion effect is more ideal.
- ◆ Long lasting fragrance, fresher and cleaner environment
- ◆ Maintain the original properties of the liquid without generating secondary harmful gases

Applicable environment: hotel room, KTV, conference room, sample room, household, toilet, showcase

Please notice:

1. Microcomputer automatic control, enjoy fragrance service at any time, flavor concentration adjustable.
2. Essential oils, perfumes, toilet water, disinfectant and other liquids can be added to the atomization diffusion.
3. Equipped with a bracket to secure the wall.

Special Statement:

This product has two intellectual property rights protections such as appearance patents and utility models.

DR-03 扩香机性能参数与介绍

Performance parameter :

Model : DR-03

Size : 120 X 220 X 260 mm

Rated Voltage: 220V/50HZ

Power : 18w

Volume : 20Db

Oil consumption : 1.5ml/h(continuous)

Weight : 4 kg

Capacity : 350ml

Applicable space: $\leq 1000\text{m}^3$

Material :

1. Exterior material : aluminium alloy , with anodized surface
2. Nozzle material : imported stainless steel 316L
3. Air pump : imported air pump, with 24-hour continuous operation and more than 15000 hours of service life, producing low noise.

Operating Principle :

1. Applying two-fluid atomization principle, with gas and essential oil completely mixed within the nozzle, forming Nano atomization sprayed from the aromatic pipe.
2. Full – automatic control by microcomputer, allowing aroma service at any time, intensity of scent available for adjustment.

Service life :

Two years warranty for the equipment, with 5-6 years of service life.

DR-04 扩香机性能参数与介绍

Performance parameter:

Model : DR-04

Size : 120 X 200 X 220 mm

Rated Voltage: 220V/50HZ

Power : 15w

Volume : 20db

Oil consumption : 1 ml/h(continuous)

Weight : 3.5 kg

Capacity : 150ml

Applicable space: $\leq 600\text{m}^3$

Material :

1. Exterior material : aluminium alloy , with anodized surface
2. Nozzle material : imported stainless steel 316L
3. Air pump : imported air pump, with 24-hour continuous operation and more than 15000 hours of service life, producing low noise.

Operating Principle :

1. Applying two-fluid atomization principle, with gas and essential oil completely mixed within the nozzle, forming Nano atomization sprayed from the aromatic pipe.
2. Full – automatic control by microcomputer , allowing aroma service at any time, intensity of scent available for adjustment.

Service life:

Two years warranty for the equipment, with 5-6 years of service life.
