

Material	ABS,PMMA,PA,PE,POM,PC,PP,PET,PVC,HDPE etc.
Dimension	Min.11.06*3.48*4.5mm Max.407.55*147.94*19.62mm
Color	Multiple colors as customer's requirements.
Surface treatment	Silk-screen printing,laser engraving,gold stamping,UV, painting, vacuum plating
Product processing procedures	Molding--->injection molding--->primer spraying--->plating--->top coating--->printing--->finished product
Related equipment	CNC machine, drilling machine, milling machine, grinding machine, spark machine, plastic injection machine
QC check point	Dimension, outlook(color, surface finish etc.), adhesion, alcohol tolerance, and other quality check points as customer's requirements or product's applications.
Key Technology	Mold design, surface treatment
Order Processing procedures	1. Confirming drawing, order quantity, unit price, surface treatment, packing and shipping with clients. 2. Making mold and pre-production samples and confirming them with clients. 3. Mass production. 4. Customer inspection or self-inspection as clients requirements. 5. Arranging shipments. We can provide shipping assistants, clients can also arrange shipping themselves.
Packing	Standard packing for plastic parts or as client's requirements.
Delivery time	Lead time for mold is around 15-60 days depends on the complexity and size of mold. Lead time for plastic parts is around 3-4 days.
Other service	Product design
