

140W 2 in 1 USB-C to USB-C Charging Cable

Specifications:

- Model No.: PS-938
- USB-C1/C2 Single Output: PD 140W Max
- USB-C1+USB-C2 Dual Output: 130W Max, 112W+18W Max
- Data Transfer Rates: 480Mbps
- Material: Nylon Braided + PVC
- Length: 1.2M(0.9M+0.3M*2)

Notes:

1. Data transfer: Supports one-to-one transmission only.

2. Charging:

Single Device: Maximum charging power of 140W is achievable with a single device connected. Currently, only the 16-inch MacBook Pro (M3 Pro/M3 Max, 2021) supports 140W charging via USB-C.

Multiple Devices: When charging two devices simultaneously, the maximum combined power output is 130W. The first device connected generally receives higher power. The actual power each device receives depends on its power needs. Both devices must support PD charging for optimal performance.

3. Power Adapter: Use a power adapter with a minimum output of 45W for best charging results when charging multiple devices.
