

BRMS series thermal protector

Structure characters:

BRMS thermal protector series that are snap-action type and used for protection against over current and over temperature are made by automatic machines. They are small in size(14*5.8*2.2mm) ,long endurance life and sensitive to temperature and current.。

Application:

Notebook battery pack,mobil battery pack,power tool battery pack , electrical device and house-hold appliance

Parameters:

Open temperature: 45C~100C ±5C(According to customer's requirement)

Rated voltage: DC 24V

Rated current: 4A

Life endurance: 10000 cycles under rated condition

Mark:

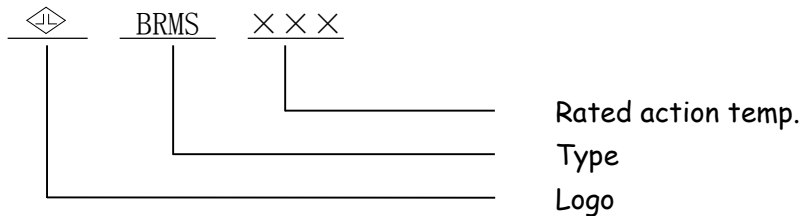

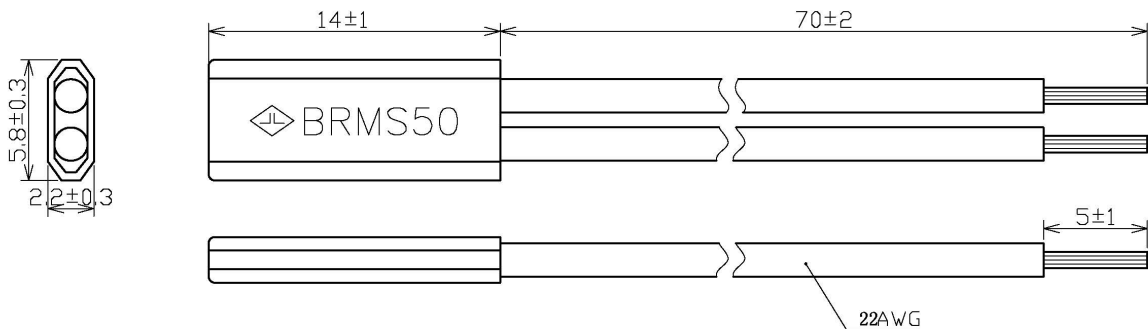

Figure:

Ps. Leads wires or nickel strip can be according customer's requirement.
