

This Rotary heater using far infrared heating tube and new UV paint technology, with the function of cold wind setting and LCD display.

Are you still worrying about these when choosing a heater?

1. The heater is not uniformly heated, causing the color to discolor, and there is no heat insulation protection. If the customer accidentally touches the machine, the skin will be burned.
2. The electricity and heat consumption rate is high, it takes a long time, and the hair is frizzy and cangenerate static electricity.
3. Uneven dyeing
4. Dry and damaged
5. Scald customers
6. High energy consumption

Main Features:

1. Fully automatic multi-angle adjustment: Different heights and angles can be adjusted to meet the different needs of customers.
2. Infrared scattering technology: The Built-in Far-infrared Heating Tube Can Cover the Entire Head, Evenly Deliver Heat to The Hair and Roots, Promote Circulation and Accelerate Metabolism, Making Hair Delicate, Soft and More Elastic.
3. Unique cooling function: Make Customers More Comfortable to Use, Easy Perm, Dye, Hair Care
4. Screen function to explain: Temperature display, time display, temperature button, time button, cold wind button, swing button, on/off button

Our rotary heater has six characteristics

1. Easy to operate, safe and reliable
2. Far infrared
3. Cold wind setting
4. LCD display operation
5. New UV paint technology
6. Silent motor
7. Multi-angle adjustment

Product Parameters

Product Name : Rotary Heater

Model No.: JPB002

Supply Voltage: 220V

Average Power: 950W

Product Dimension: 670*580*1680mm

Net Weight: 9.41KG
