Customization:

Open to discussing any workable ideas or customized requirements.

Additional Specifications:

Frame Depths:

120mm, 160mm, 180mm, and 200mm.

Opening methods:

fixed windows, project out awning windows.

Aluminum alloy extrusion wall thickness:

2.5mm to 3mm extrusion wall thickness

ease of operation:

Upper and lower sash operate fluently and easily.

•Construction:

Available with interior access doors and between-glass blinds

•energy efficiency :

thermal insulation

•aesthetic appeal:

create captivating facades, that maximize natural light and panoramic views.

•customization options:

from color choices to panel configurations, enabling architects and designers to manifest their creative

visions with precision.

•Anchoring System:

heavy-duty steel anchors ensure secure installation.

Renovation Panning:

A broad selection is available to accommodate various renovation needs.

Sustainability:

High recycled content in aluminum framing.

Availability:

Offered through Advantage by Jianli
