Metal Letters

Metal letters are suitable for most of the application and environments, they are anti rust, antioxidant and dural with long life span.

Normally we choose stainless steel, aluminium and brass to make both the channel letters and solid cut letters.

Metal letters we make can be from 50mm to 2,000mm height with different font style per customer's request.

Shenzhen Focus Sign Co., Ltd.

Metal Letters

We have different finish treatments for our metal signs.

Mirror polished/brushed/painting/electroplating can be your choice for different application.

Polished mirror finish is shining and eye catching; brushed finish is classical; different painting finish looks vigorous; electroplating have golden/black satin/rose/titanium/nickel colors for choice.
