

**Model No. BD04-UTV800**

Specifications:

|                               |                                                                                                                      |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------|
| Cooling method                | Liquid cooling                                                                                                       |
| Power                         | 110HP/81kw                                                                                                           |
| Cylinder displacement         | 1000cc                                                                                                               |
| Engine type                   | V Double Cylinder / 4 stroke / Overhead Cam (SOHC)                                                                   |
| Fuel system                   | Electronic Fuel Injection (EFI)                                                                                      |
| Gearbox                       | Auto CVT P/R/N/L/H                                                                                                   |
| Transmission system           | 2WD/4WD switchable                                                                                                   |
| Dimensions                    | 3840x1910x1900mm                                                                                                     |
| Payload                       | 336kg                                                                                                                |
| Curb weight                   | 662kg                                                                                                                |
| Tank capacity                 | 36L                                                                                                                  |
| Wheel base                    | 2286mm                                                                                                               |
| Ground clearance              | 356mm                                                                                                                |
| Front shock absorber          | 2.5" nitrogen detent shock absorber                                                                                  |
| Front /Rear Brake             | Hydraulic disc brake front three calipers & double after calipers                                                    |
| Electronic steering assistant | Standard                                                                                                             |
| Front / Rear Tyres            | 29x9-14/29x11-14,radial tyre                                                                                         |
| Wheel hub                     | Cast aluminium hub                                                                                                   |
| Front/Rear suspension         | Double A arm independent suspension; Rear rocker arm & high ground clearance balancing bar.                          |
| Lighting                      | Iconic white LED,low/high & red tail lights,brake lights                                                             |
| Seat/Seat belt/Adjustment     | Encirclment seat(4-way adjustable), 4-point seat belt                                                                |
| Rear storage capacity         | 136kg                                                                                                                |
| Steering wheel                | High assistant quick adjustment system retractable adjustable tilt multifunction steering wheel for race performance |
