

Six-speed segmented intelligent transmission

Variable frequency motor, adjust wind speed as you like, to meet different needs

Breeze file (1-2 gears)

Like a spring breeze, soft and comfortable
Take care of falling asleep at night
and stay away from air-conditioning diseases

Stroke gear (3-4 gears)

Suitable wind speed, ventilation and cooling
Enjoy the coolness in the scorching summer

Strong wind gear (5-6 gears)

Strong wind speed, fast heat dissipation
Blow away hot sweat and dampness, relieve heat and dryness

New Bluetooth audio experience

Connect at any time within 10 meters of wireless Bluetooth,
enjoy a relaxing leisure time

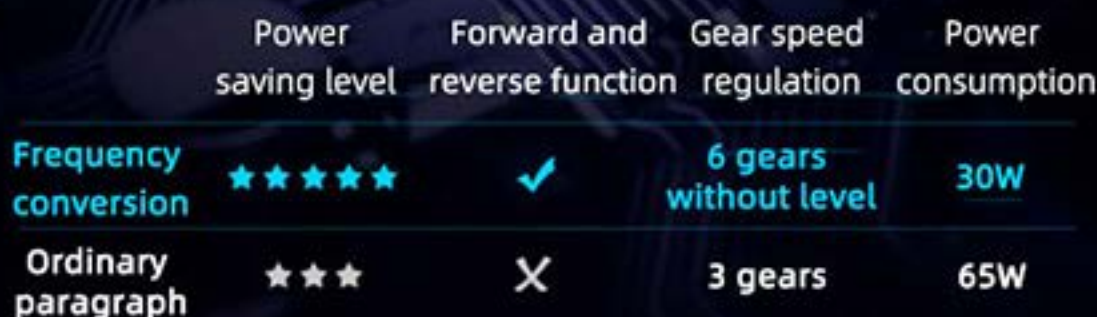

Bluetooth 4.0 wireless transmission

The wireless data transmission connection is simple,
high-speed and stable,
allowing you to enjoy a pleasant wireless music
playback experience.

The sixth generation of frequency conversion technology

Frequency conversion forward and reverse rotation,
no level gear speed regulation,
bring you a different intelligent experience

	Power saving level	Forward and reverse function	Gear speed regulation	Power consumption
Frequency conversion	★★★★★	✓	6 gears without level	30W
Ordinary paragraph	★★★	✗	3 gears	65W

Refreshing

Embrace the quiet natural wind and enjoy a comfortable life.

Remote control
frequency conversion

6 speeds

Forward and
reverse function

Smart timing

Energy saving

Timing shutdown, smart and worry-free

Appointment timing 1 hour / 2 hours / 4 hours / 8 hours

Product Details

REAL
SHOW

High light transmission acrylic lampshade

Adopt high-quality acrylic material panel,
the light transmission is natural and not easy to age,
the transmitted light is soft, warm and comfortable

Heavy enough and durable enough

The quality of the copper wire
determines the quality of the fan

THICKENED STEEL

Longer life
Not easy to rust

BOLD COPPER WIRE

Conductivity
Good heat dissipation

DOUBLE COVER URANIUM WHEEL

Shock proof
Running smoothly

One key switch forward and reverse

Equipped with air-conditioning,
the summer turns forward
and the winter turns reverse in two modes

Forward to cool air

Use with air conditioner in summer to speed up
the circulation of cold air
Cooling faster, reducing electricity consumption

Reverse air convection

Use with heating in winter
to promote warm air circulation.
Better heating effect

REMOTE CONTROL / WALL CONTROL

Different control configurations are available

1 REMOTE CONTROL

Wiring mode of one live line and one zero line

- ✓ **Light transformation**
- ✓ **3 gear wind speed**
- ✓ **Simulate natural wind**
- ✓ **Timed shutdown**

2 WALL CONTROL

Wiring mode of two live line and one zero line

- ✓ **Light transformation**
- ✓ **3 gear wind speed**
