01

Company overview

Establishment time and export performance

Establishment time

ALL NEW SEMI was founded in March 2007 and has been around for fifteen years.

Export performance

The company exports electronic components worth over 1.5 million US dollars annually, mainly to Europe, North America, and Asia.

Cooperation partners

The company has established long-term cooperative relationships with many factories, agents, distributors, inventory merchants, and spot traders..

Independent brand and certification status

Independent independent brand

The company has its own independent brand ANSC and holds certifications such as ISO9001, SGS, CE, FCC, RoHS, etc.

Authenticates

These certificates demonstrate that the company's quality management and environmental management system complies with international standards, and its products have good quality and reliability.

Brand positioning

The ANSC brand is mainly committed to providing high-quality electronic components and high-quality services to meet the needs of customers.

Company characteristics and core competitiveness

● Company characteristics

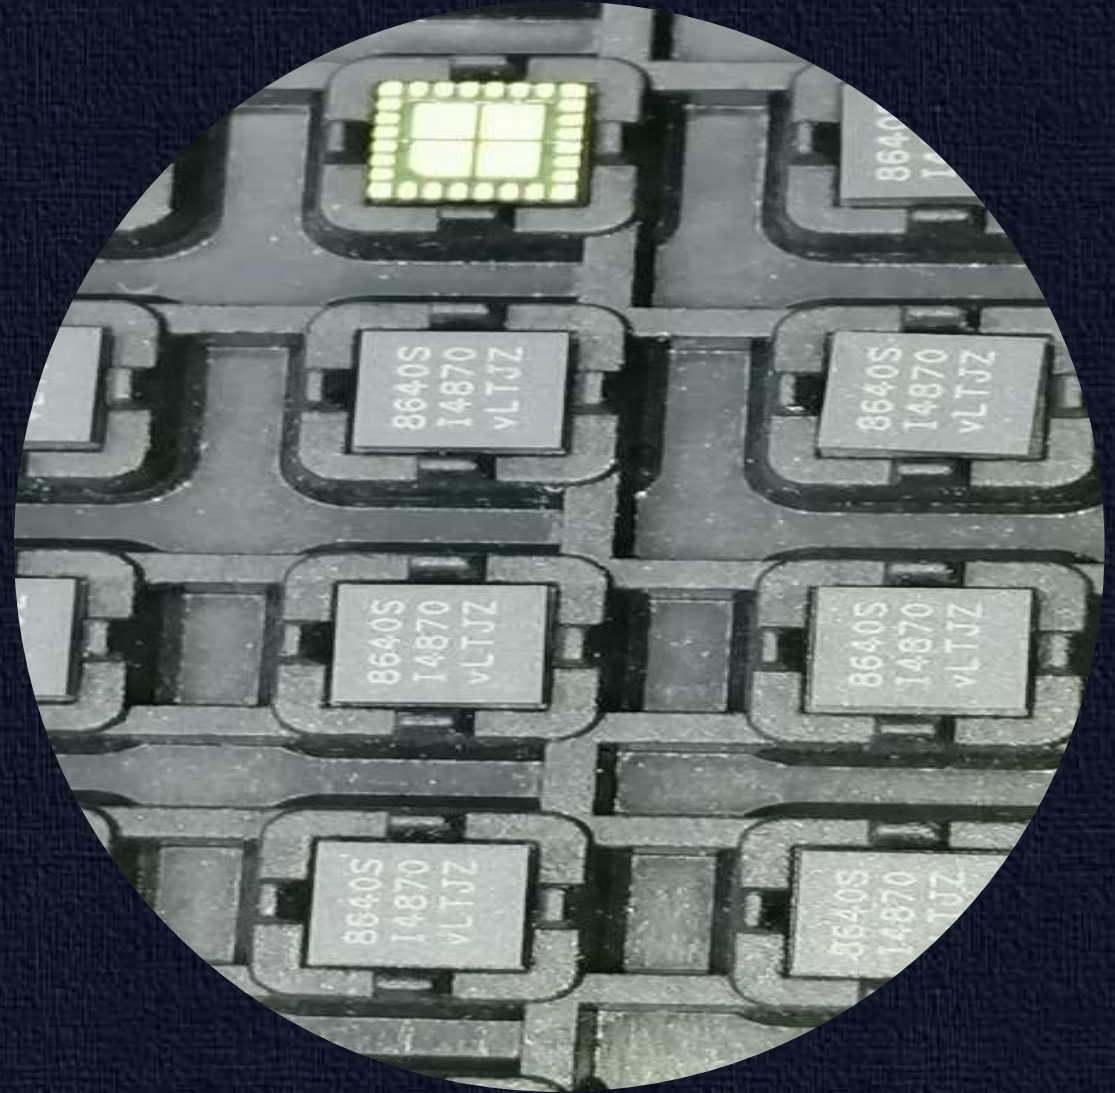

Strong professionalism, reliable supply channels, reasonable prices, and thoughtful service.

● Core competitiveness

Rich product variety, high-quality service, stable team, and extensive customer base.

● Market Positioning

ALL NEW SEMI mainly targets electronic component dealers, manufacturers, and end users, providing one-stop supply services.

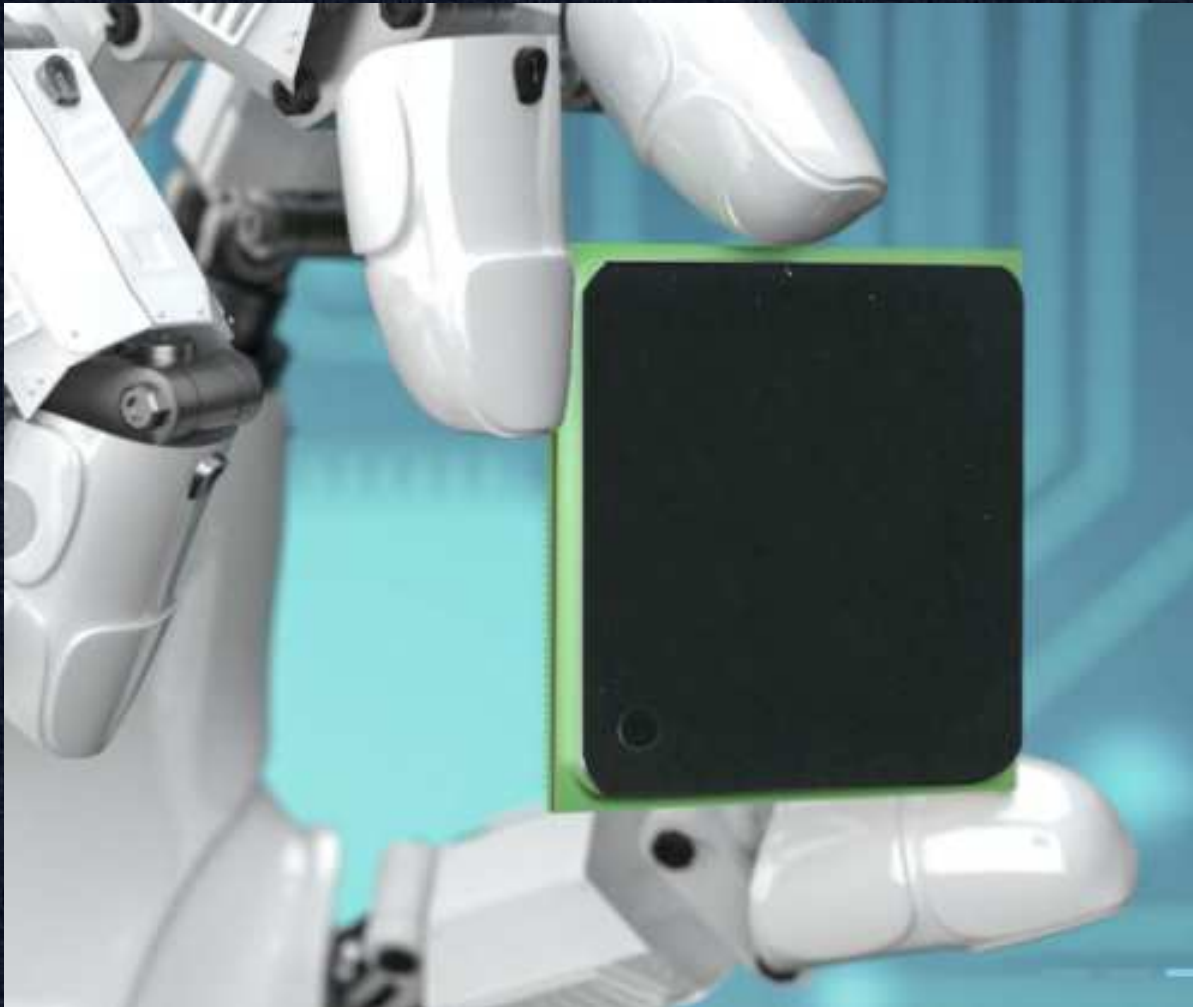

02

Products and Services

Integrated circuit chip spot distribution

Integrated circuit chip

We specialize in distributing various integrated circuit chips, including MPUs, MCUs, Memory ICs, Power Management ICs, and more. We have a rich product line and sufficient inventory to meet the needs of various electronic devices.

BOM List Service

Inventory service

We provide BOM list services and can customize exclusive BOM lists according to customer needs. We have a professional R&D team and rich industry experience to ensure product quality and timely supply.

Component supply

We provide various types of electronic components, including resistors, capacitors, inductors, diodes, etc. Our product line is complete and can meet the needs of various electronic devices.

Technical support

We provide professional technical support to solve problems encountered by customers during use. We have a comprehensive after-sales service system that can respond and handle various issues in a timely manner.

03

Application areas and customer support

Product application areas

01

Electronic component

Our electronic components include various types of integrated circuits, chips, resistors, capacitors, inductors, etc. These components are widely used in various electronic products, such as computers, mobile phones, household appliances, etc.

02

Service

We provide customized services, and according to customer needs, we can produce various special specifications of electronic components, such as low-end IC wafers, PCB/PCBA, cooling fans, etc.

03

After sales support

We provide professional after-sales service, provide technical support and maintenance to customers, and ensure the smooth progress of their production process.

Hot sale Product Showcase

Professional team and technical support

Customized cooling fan

Customized wired charging

Customized LOGO&Packaging

Shell customization

Customized Wireless charging

Customized small home appliance motherboard

IC label card customization

Customization of connectors and cables

Technical support

Our technical team provides professional technical support to ensure that customers maintain good condition during product use and promptly resolve any issues that may affect product operation.

Comprehensive customer support and service

Pre sales consultation

Before placing an order, we can provide customers with detailed product information and service guidelines, answer their questions, and solve their confusion.

Worry free after-sales service

After the product is sold, we provide professional after-sales service, provide technical support and maintenance to customers, and ensure the smooth progress of their production process.

In sales tracking

After the customer places an order, we can track the production process and logistics transportation of the product to ensure that it arrives in the customer's hands in a timely and accurate manner.

04

Partners and entry platforms

Numerous friendly customers and reliable suppliers

Partners

Our partners include many well-known electronic product manufacturers, suppliers, and distributors, such as Intel, AMD, TI, ON, ABB, etc. We maintain long-term cooperative relationships with our partners to jointly expand the market.

Reliable supplier

We focus on selecting reliable suppliers to ensure reliable product quality and stable supply. After establishing a cooperative relationship with suppliers, we will implement strict quality control to ensure that our products meet standard requirements.

Customer satisfaction

We always prioritize customer satisfaction and provide high-quality and timely services to our customers. We focus on customer demand analysis, provide customized solutions, and win customer trust and satisfaction.

Long term cooperation and exports to over 130 countries worldwide

Long-term cooperation

We establish long-term cooperative relationships with our clients, ensuring stable cooperation and sufficient product supply through regular communication, negotiation, and other means. We focus on safeguarding the interests of our customers and providing them with reliable services.

Exported to the world

Our products have been exported to over 130 countries worldwide, covering multiple regions such as Asia, Europe, and Africa. We achieve product sales and promotion through cooperation with local agents or distributors.

Market demand expansion

As the market size expands, we continuously expand into new application areas and customer groups. For example, we have started to enter the fields of drones, smart homes, intelligent security, and continue to expand our market share.

Successfully settled on over 10 B2B platforms

Platform entry

We have successfully settled on over 10 B2B platforms, including Alibaba, Global Resources Network, Made in China Network, etc. By joining the platform, we have expanded our sales channels and customer base, increased brand awareness and product exposure.

Online promotion

On B2B platforms, we actively promote and advertise online, increasing brand awareness and product exposure through advertising, link donations, and other means. We also utilize the data analysis and marketing tools provided by the platform to better understand customer needs and market trends.

Offline communication

On B2B platforms, we can communicate online with suppliers and customers from around the world. We establish contact and collaborate with our partners through information dissemination, inquiry and quotation methods.

05

Contact information and official channels

Contact information

E-mail

Customers can contact ALL NEW SEMI via email, and our customer service team will reply to your email within 24 hours.

Telephone

Customers can call our phone number, and our customer service team will be enthusiastic in serving you.

Social media

Customers can contact ALL NEW SEMI through social media, and our customer service team will reply to your social media messages within 24 hours.

Official website and online store

Official website

The official website of ALL NEW SEMI is <https://allnewsemi.com>
Customers can learn about our latest products and discount information on the website.

online store

ALL NEW SEMI's online store is <https://allnewsemi.shop>
Customers can purchase all of our electronic products in the store.

After-sale service

If customers encounter any problems during the purchase or use process, they can contact our after-sales service department at any time, and we will provide professional and timely solutions for customers.

Customer satisfaction and trust commitment

1

Customer satisfaction

ALL NEW SEMI always adheres to the principle of customer satisfaction, winning the trust and satisfaction of customers by providing high-quality products and services, as well as professional solutions.

2

Trust commitment

ALL NEW SEMI will always uphold the interests and rights of customers, ensure product quality and reliability, and provide timely and professional services.

3

Continual improvement

We will continuously reflect and improve ourselves, continuously improve product quality and service level, to meet the constantly increasing requirements of customers.
