

3-in-1 Magnetic Foldable Wireless Fast Charger Holder

Color Scheme

Product parameter

Model number	M103
Charging port	Type-C
Input	5V-9V/2.2A (Max)
Output	Mobile phone 15W(Max)+ TWS headset 5W(Max)+Watch (Max)5W+5W C port output. Total power: 30W(Max)
Color	White, black
Material	PC+ABS+Magnetic+Zinc alloy
Product size	76.2*76.2*27.5mm
Coil	Single coil + single coil + single coil
Color box size	80*60*90mm
Net weight	178g
Gross weight	230g
Certificate	FCC, CE, RoHS,UKCA,
Packing list	1* USB-C data cable, 1* instruction manual, 1* after-sales card, 1* PD charger
Indicator Lights	<ol style="list-style-type: none">1.After power on, the light flashes 3 times and then turns on. Touch the switch to control the light.2. AirPods charging, watch charging without light3. When charging two devices at the same time, it is always on.4. FOD: Three devices and there is a foreign object, the corresponding light flashes quickly.
Tips	<ol style="list-style-type: none">1. For fast wireless charging, you must use QC3.0 and PD adapter.2. The package does not include a wireless charging receiver

Features

- ★1. **[Magnetic charging]** Magsafe magnetic wireless charging, perfectly compatible with the new iPhone 15 series.
- ★2. **[Five-in-one wireless charging]** Can charge iPhone, Airpods, Apple Watch, night light and 5W C port output at the same time
- ★3. **[Stand design]** Vertical charging, charging while playing, more diverse charging methods, any folding angle, easy to carry.
- ★4. **[5 charging modes]** Compatible with 15W, 10W, 7.5W, 5W, 2.5W at the same time, more stable performance.
- ★5. **[Strong adapter compatibility]** Type-C port, compatible with QC and PD fast charging, keep up with market trends.
- ★6. **[High-end texture]** PC+ABS+zinc alloy electroplating shell material, with sun-drying process, high-quality texture, beautiful and generous.

Cautions

1. When charging iPhone, Airpods and Apple Watch at the same time, in order to achieve fast charging, QC3.0 and PD adapters must be used together.
2. The mobile phone charging part requires that the mobile phone device has a magnetic suction function, or is equipped with a magnetic suction protective case/magnetic sticker to be adsorbed and charged.
3. When charging Apple iPhone15 series, it supports up to 7.5W fast charging, but does not support 15W charging (reason: 15W is Apple's private protocol).
4. When the input voltage is 5V, the power is reduced, and two devices can be charged at the same time;

7.5W
For iPhone

iPhone 12/12 Pro/
12 Pro Max/12 mini

iPhone 11/11 Pro/
11 Pro Max

iPhone XS/XS Max/XR
iPhone 8/8 Plus/X

Works with the iPhone 12 Series

iPhone 12 mini

iPhone 12

iPhone 12 Pro

iPhone 12 Pro Max

And iPhone Cases with MagSafe
