

Ethernet Extender

Double Female cat6 keystone coupler solved problem of having multiple Cat6 cables, but not one long enough.

Ethernet coupler is a more economical extending ethernet connection alternative versus buying longer patch cord and ending up with 2 cords to store somewhere.

This is a great bridge to connect many cables and make 1 long lan cable if need be and allow high speed connection.

Nickled copper shell

This rj45 female to female coupler is made of copper shell to ensure signal shield and without loss. Nickled copper shell to guarantee corrosion free and shining out-looking.

Materials & Technical

- All 8P8C of ethernet connector are golden plated to support better network connector with giga speed.Support with TIA/EIA 568-C.2 standard.
- The body of keystone adapter is made of ROHS ABS materials and nickled copper shell to guarantee long time durability.

Warranty

18-month warranty and provide friendly, easy-to-reach support.

Widely Compatibility

This CAT6 keystone inline coupler compatible with all kinds of stp (shielding twisted pair) and utp cat6, cat5e, cat5 Ethernet cables.
