5. Interactive Function

When you use the interactive function for the first time or the device is moved after last calibration, you need to do calibration.

Under the **Android system**, when the open the projector successfully, and then press the **red calibration button** on the front of the projector, and release it after **2 seconds**. A beep will be heard. At this point, **4-corner calibration** will be activated. Press the pen tip on 4 corners of the display area by sequence from 1 to 4 to finish the calibration. Please note that a beep must be heard before you move to the next corner. After calibrating successfully, you will hear two short beeps. Then you can use the product.

Wireless dongle

If you want to connect to other devices such as computer, then wireless connection is a good choice.

Firstly connect computer to the projector, secondly connect the dongle to the computer, and then it can start to use!
