Carbon Fiber Pickleball Paddle with Aero Throat, USAPA Approved Pickleball Racket for Power & Control, Polymer Honeycomb Core, Textured Carbon Grit Surface, Christmas Pickleball Gifts

-
- **Unibody Design & Foam Injected Walls:** The racket features a thermoformed unibody design, creating a compact board structure that enhances resistance to deformation and durability. The edgeless design, combined with the injection of specialized foam around the perimeter of the paddle, contributes to added weight and stability. This enhances the optimal sweet spot, improves shot precision, and absorbs vibrations.
- **Carbon Grit Textured Friction Surface:** The pickleball paddle features advanced 3K T300 carbon fiber texture technology with a durable and long-lasting grit coating. This enhances the friction, ensuring the ball stays on the paddle longer. It improves precision, control, and adds more spin during serves, drives, and dinks. Perfect for pickleball enthusiasts looking to take their game to the next level, it's an ideal choice.
- **Aero Throat and Comfort Grip:** The open throat is designed for optimal airflow, enhances both ball control and power play, ensuring a smooth and controlled gaming experience. The integrated grip features high-grip and superior cushioning material with sweat-absorbing ventilation. With a 4.25" grip circumference and a 5.5" length, enjoy superior control and comfort, minimizing wrist fatigue during extended matches.
- **Polypropylene Honeycomb Core:** The 16mm thick polypropylene honeycomb achieves the perfect balance of durability, strength, and flexibility. Its honeycomb structure effectively reduces vibrations, providing a softer touch and control while ensuring maximum power and consistent with each shot.
- **USAPA Approved:** To ensure pickle ball paddle meet the highest standards, the paddles are tested and approved by the United States of America Pickleball Association. Each paddle comes with exquisite packaging, including a pickleball cover, paddle cleaning eraser, and extra replacement grip tape, keeping your paddle looking like new for longer.
- **Tip:** Please confirm the paddle size, thickness, and color before purchasing. The green paddle comes in 16mm and 20mm, with dimensions of 15.75" x 7.7". The red paddle is available in 13mm and 16mm, with dimensions of 16.45" x 7.4". Edgeless paddles generally have a relatively smaller sweet spot compared to those with an edge guard.

Size One Size
Grip Size 4 2/8 inches
Sport Pickleball
Material Polypropylene, Carbon Fiber
Skill Level All
Frame Material Carbon, Carbon Fiber, Polypropylene
Shaft Material Carbon Fiber
Item Weight 221.13 Grams
Age Range (Description) Adult
Product Dimensions 16.45"L x 7.4"W
Item Package Dimensions L x W x H 17.76 x 9.84 x 2.24 inches
Package Weight 1.18 Kilograms
Item Dimensions LxWxH 16.45 x 7.4 x 0.1 inches
Brand Name Warping Point
Warranty Description 6 Months Warranty
Model Name Warping Point Ascent Power
Color Red - Power - 16mm
Suggested Users unisex-adult
Manufacturer Warping Point
Included Components Pickleball Paddle, Pickleball Cover, Paddle Clean Eraser, Replacement Grip Tape
