

Specification	Rod Diameter (mm)	8 mm
	Rod Length (m)	150m
	Frame Spec. (cm)	90x80x48 Wheel
Material	Fiber glass rod inner	Extruded by fiber glass and high strength resin at high temperature
	Fiber glass rod outer	High Density polyethylene coating
	Metal Frame	Steel with high-temperature sprayed plastic or hot dip galvanized
Physical Property	Fiber glass content	75-80%
	Density	> 1.9gr/cm3
	Working environment	-40 to +80
	Minimum Pulling strength	4000N +/-5%
	Consistency of rod	137gr/m
	Flexural Modulus	> 46.500Mpa
	Elongation at break	2.5-3%
	Min Bending Radius	388mm
