### KW-XU21 Specification

|                 |                                                 |
|-----------------|-------------------------------------------------|
| Product Name    | Bluetooth speaker                               |
| Size            | 252*67*98MM                                     |
| Weight          | 546g                                            |
| Battery         | 1200mAh                                         |
| Playing time    | 4hours                                          |
| Charging time   | 3 hours                                         |
| Output power    | 100HZ~20KHZ                                     |
| Speaker Size    | 52mm                                            |
| Output power:   | 4Ω 8w *1                                        |
| Input voltage:  | 5V                                              |
| SNR:            | 80db                                            |
| Work Voltage:   | 3.7v                                            |
| Function        | BT, TF, FM, USB,AUX,MIC,TWS,LED,6V Solar energy |
| Material        | ABS                                             |
| package         | Color Box                                       |
| Accessories     | 1*cable 1*speaker*belt                          |
| Available color | Blue ,Black,Gray                                |
| Package size    | 25.5*7.2*10.9cm                                 |
| carton size     | 52.5*38.3*57.2CM                                |
| ctn/pcs         | 50pcs/Ctn                                       |
| N.w             | 32.7kg                                          |
| G.W.            | 33.7KG                                          |
