2010 SPEC SHEET

2023.1.10

Selling Points
◆ 1080p camera, with 5-inch large screen, observe the details of every movement of the baby more clearly
◆ The 5050mAh large-capacity battery can be used for a longer time, and it is more convenient to carry it with you to observe and take care of the baby.
◆ 6*940nm infrared lights, no visible red light in the dark, avoid light distraction, and present high-definition pictures without disturbing the baby's sleep
◆ Support dual-mode wifi, watch the real-time picture on the monitoring screen and mobile phone at the same time, and take care of the baby through the mobile phone when you are outside.
◆ The PTZ rotates to cover a 355° viewing angle, and the room status can be checked without dead ends.
◆ Support full-duplex intercom, you can communicate with the baby at any time.
◆ Support intelligent VOX wake-up, 5-level sound threshold setting, when abnormal sound is detected, the monitoring screen can be automatically lit to remind parents.
◆ The camera has a temperature detection function, which provides instant warning beyond the setting range, monitors the room temperature in real time, and provides a comfortable
◆ One-button digital zoom, make every expression and movement detail of the baby clearer.
◆ Camera lullabies, play soothing music to help babies fall asleep quickly. And the monitor's white noise provides parents with a sleep-aiding environment and creates a sleeping atmosphere.
