

Specifications

|                                |                            |
|--------------------------------|----------------------------|
| Parameter categories           | detailed information       |
| model                          | SDL608                     |
| voltage                        | DC12V plug-in              |
| power                          | 15W                        |
| size                           | 227*227*690 mm             |
| coverage area                  | 3000m³                     |
| The capacity of essential oils | 1000ml                     |
| material quality               | Metal + PC board           |
| pigment                        | Black, silver              |
| control method                 | Bluetooth/wifi APP control |

|                       |                              |
|-----------------------|------------------------------|
| operational principle | Fluid atomization technology |
| net weight            | 5.8kg                        |
