TECHNICAL SPECIFICATION SHEET

OUTSOUND ESCAPE

AI-Assisted Korean Pronunciation Learning Software

An interactive romance visual novel combining Korean dialogue choices, spoken-response practice and pronunciation feedback. Intended as supplementary content for university, adult and corporate Korean-language learning.

INSTITUTIONAL AUDIENCE: AGES 15+* | ANDROID | KOREAN / ENGLISH UI

01 | PRODUCT IDENTIFICATION AND CURRENT EDITION

Product / developer	Outsound Escape / WhatWeCare Incorporation (주식회사 왓위케어). [1,2]
Current edition	The released Google Play Android game; package: com.whatwecare.outsoundescape. Institutional supply uses the same public game under separately agreed rights. [1,4]
Intended audience	Users aged 15 and above, primarily university-level and adult learners, educational institutions and corporate language-training programs. See Section 08 for rating scope. [4]

02 | GUIDED PRACTICE AND PROGRESSION

Speaking activity	In Pronounce mode, select one of three Korean dialogue options and read the selected line aloud for pronunciation feedback. [1,4]
Learner guidance	Korean text and romanized pronunciation guides; translations in English mode. Spoken exercises remain in Korean in both interfaces. [1]
Practice review	Replay saved recordings, compare pronunciation graphs and revisit completed character chapters for repeated practice. [1]
Separate progression	Dialogue choices affect Affection and romance endings. Pronunciation results affect Confidence Score and appearance. The hidden Career Ending requires all five character stories to be completed and a Confidence threshold to be met. [1,4]

03 | PRONUNCIATION FEEDBACK

Syllable Accuracy Syllable-level feedback.	**Word Articulation** Word-level pronunciation feedback.	**Sentence Delivery** Sentence-level delivery feedback.
Waveform Comparison Speech amplitude and timing.	**Pitch Contour** Pitch and intonation patterns.	**Spectrogram** Time-frequency intensity patterns.

These named indicators and visualization types are listed in the supplier-provided specification [4]. The public store confirms scoring, replay and comparison graphs, but does not name every metric [1].

04 | INTERACTIVE CONTENT AND PLAY MODES

Character / story	Female protagonist: five male romance interests; male protagonist: five female romance interests. Standard routes have five chapters and ten choices; some include an early-ending branch. Replay and illustration collection are available. [1]
Pronounce / Skip	Pronounce enables voice practice and Confidence-related progression. Skip uses touch choices, does not require microphone permission and provides neither Confidence points nor the Confidence-linked hidden ending. [1]
Mode change / usability	Changing play mode requires starting over. Landscape-only display, auto-save, adjustable font size and no ads are described in the store listing. [1]

TECHNICAL SPECIFICATION SHEET / CONTINUED

SYSTEM & SUPPLY INFORMATION

05 | PLATFORMS, LANGUAGE AND OPERATING CONDITIONS

Pronounce requirements	Android 13 or later, supported on-device Korean speech recognition and microphone permission, as described on Google Play. Android version alone does not establish compatibility. [1]
Setup / device checks	A one-time Korean recognition-model download may be needed. Check installation and speech support on each intended phone/tablet model; other devices may use Skip if the app is installable. [1]
Connectivity	The terms describe offline story progression. Installation, initial speech-model setup and update checks can require connectivity; full offline operation of all features is not guaranteed here. [1–3]

06 | TECHNICAL BASIS AND DATA HANDLING

Speech / local processing	The publisher describes device-supported Korean recognition and on-device AI analysis. Recordings, player name and progress are kept on-device, not sent to company servers. User-initiated recording export is separate. [1–3]
Other network activity	The privacy policy identifies Google Play services, Korean model downloads and Expo update checks; update metadata includes an installation-level identifier. Do not interpret local voice processing as zero network activity. [2]
Data safety / deletion	Play reports possible device/other-ID collection, no declared third-party sharing, encrypted transit and “Data can’t be deleted.” Separately, the privacy policy states that uninstalling or using Start Over deletes local recordings, name and progress. [1,2]

07 | INSTITUTIONAL LICENSING, SUPPORT AND ROADMAP

License / commercial terms	Per-user, per-device and per-institution options are described in the supplied specification. Rights, quantities, price and term require a written agreement; public-store terms grant personal, non-commercial use, not a blanket institutional distribution right. [3,4]
Technical support	Published contact: info@berhmkorea.com / +82 2 468 0627. Support hours, response times, onboarding and any service-level commitment are subject to agreed terms. [1,4]
Excluded future scope	A separate institutional Pro edition, additional localization and future features are outside this offering. Their availability, scope and release dates require separate confirmation. [4]

08 | AGE RATING, EDUCATIONAL SUITABILITY AND CLAIMS

Age / content rating*	South Korea: Ages 15+; content descriptor “Drugs” (약물), as confirmed by the supplier. This sheet addresses users aged 15+. Destination-country ratings and institutional content policies still apply. [4,5]
Educational scope	Supplementary, non-clinical Korean speaking practice. This sheet does not claim guaranteed learning outcomes, therapeutic efficacy, medical-device approval, an instructor dashboard or LMS integration. [4]

SOURCE BASIS & SCOPE | REVIEWED 29 OCT 2026

[1] Google Play listing (listed update: 21 Sep 2026). [2] Publisher privacy policy v1.0.1. [3] Publisher terms v1.0.1.

[4] Supplied specification dated 29 Oct 2026 and supplier’s direct Korean age-rating confirmation. The Korean storefront rating was not independently retrieved in this review. [5] Google Play country-specific rating guidance.

Source-based review, not an independent software, privacy or regulatory audit. Specific engine/model versions, universal device compatibility and a no-additional-payment promise are not asserted. The delivered build and written supply agreement define the actual scope.
