SOMOSTEL This J105 TWS Wireless Earphone is a fashionable in-ear bluetooth earbud built for daily music and calls. This wireless earphone features an ergonomic in-ear structure, which offers stable and painless wearing experience for long-time use. This wireless earphone comes with multiple soft pastel color options including black, white, beige, green and pink, satisfying diverse consumer preferences.

This wireless earphone adopts upgraded Bluetooth V6.0 chip. This wireless earphone delivers stable signal transmission, strong anti-interference performance and low power consumption for extended playback time. This wireless earphone supports auto fast connection; just open the charging case lid, and this wireless earphone will pair with your device instantly without repeated operation. Equipped with intelligent touch control, this wireless earphone supports play/pause, track switching, call answering and voice assistant activation with simple taps.

This wireless earphone creates immersive rich stereo sound with 13mm copper ring speaker unit. This wireless earphone reaches IPX4 daily waterproof grade, suitable for light sweat and daily use. The charging case uses convenient Type-C charging port with built-in 230mAh battery. Compact and lightweight, this wireless earphone is a cost-effective wholesale consumer electronics and popular gift choice for global buyers.
