NCR-1A Automatic snapcap capping machine

Major characteristics:

This is a station rotary type capping machine, bottle inlet, cap scraping, cap locking can be done automatically and separately. High speed of machine running, stable working, perfect suits for aluminum caps. Also can be suitable for other materials of caps with changing capping head. The cap sorter adopts oscillator which can make the rate of sorting reach 100%. Fast speed of cap feeding, simple operation.

The machine is made of quality stainless steel frames, the surface has been polished, and the appearance is artistic. It will not pollute environment, also applied to GMP standard.

Technical parameter:

No.	Items	Performance
01	Machine dimension (L×W×H)	2000mm x 600mm x 1600mm
02	Applicable size of bottle:	
	Height:	≤ 120mm
	Diameter:	Φ80mm-Φ260mm
