MODEL:EL-4313A

ITEM:USB-C 3.0 Active Extension cable for 5M/10M/15M/20M/25M/30M

Introduction:

The USB-C 3.0 Active Extension Cable extends USB data transmission beyond the standard cable length limitation while maintaining stable signal integrity through built-in active signal amplification technology. Designed for VR headsets, gaming devices, external hard drives, webcams, cameras, video conferencing systems, and other USB-C peripherals, it delivers reliable high-speed data transfer and auxiliary power support over long distances. Constructed with high-quality copper conductors and multiple layers of shielding, the cable ensures low signal loss, stable performance, and error-free transmission. It is an ideal solution for extended USB-C connectivity applications.

Features:

- Plug and Play, no driver installation required.
- Built-in active signal repeater for stable long-distance transmission.
