

DA 4-Way Square Diffuser

FK-DA is The Polyaire range of Square Ceiling Diffusers is engineered for exceptional directional performance, typically featuring a four-way airflow pattern. Constructed from extruded aluminum, these diffusers come with a removable core as a standard feature, and they also offer options for one, two, or three-way airflow patterns.

Designed with a flush frame, the diffuser is suitable for surface mounting in ceilings or can be used as a lay-in frame for T-Bar ceiling installations. The standard finish is a sleek powder coat white, with additional finishes available to meet diverse interior and architectural design needs.
