

产品名称: Borosilicate Reflex Gauge Glass

产品所在分类: Reflex gauge glass

产品总叙述: The liquid level gauge glass is a high-pressure glass window used on the high-pressure steam drum of the boiler, and is the most important part of the high-pressure liquid level gauge.

产品详情快速展示:

Product brand: Aohong

Standard: DIN7081

Material : Borosilicate glass 3.3

Type: Reflex gauge glass

Use:Observe liquid level

Product Description

Reflex level gauge glass is made from High Borosilicate, They are used in level gauge in boiler for water position. Reflex type one side facing the medium chamber is provided with molded grooves set at 90° angles. The molding process increases the resistance of the glass grooves to wear; the skin which the glass attains during molding gives it maximum smoothness and hardness. This makes it extremely resistant to the attack of boiler water.

With gasket protection, it can be used with all media at operating conditions up to 4MPa and temperatures up to 400 °C.

Data Sheet

Working Pressure(Unprotected)	35 bar, 245 °C。
Tensile Bending Strength	≥150 N/mm ²
Compressive Prestress	≥80 N/mm ²
Max. Service Temperature(Unprotected)	245 °C
