

Double loop tie wire

Loop Tie Wire is also known as tie wire or binding wire. It is easy to operate, therefore it's widely used in binding of different materials, especially for daily use.

1. Black loop tie Wire information:

- A. Material low carbon steel wire
- B. Wire dia: 1.0mm--2mm
- C. Length:4''--12''
- D. Surface Black annealed, copper, galvanized or PVC coated
- E. Feature It is easy to operate, enhances the working efficiency reduces pollution
- F. Use The loop wire as a binding wire used in packing or construction

2. Electro loop tie wire information:

- A. Electro galvanized wire zinc coat 5g/m²-15g/m²
- B. Surface treatment of galvanized iron wire Electro galvanized coating or pvc coated
- C. Tensile strength:350-550N/MM²
- D. Coil weight: 1-800kg as customers requirement

3.PVC coated Colors: green, yellow white black etc
