Company Introduction

Welcome to Elite Pins! You'll be thrilled with our service, speed and quality custom lapel pins. Elite Pins is a leading designer and manufacturer of custom lapel pins.

We have the best prices for custom lapel pins and challenge coins as well as a 100% Quality Guarantee and first class service.

Always focusing on details.

As one of the largest manufacturers of custom pins, custom coins, custom medals, promotional key chains and custom dog tags, we understand that you want your promotional items quickly, at a good price and that it has got to be an easy process.

TEAM

Our highly-trained sales teams make the purchasing your custom lapel pin process very simple, fast and pleasurable. We excel at customer service, and look forward to exceeding your expectations. We'll walk you through the process, provide you with a brief education, and handle all aspects of the transaction. We'll make recommendations based on your design.

Mission Statement

To deliver best-in-class customer service and continually exceed expectation to the customers we serve. Being the premier supplier in Metal Crafts and Awards, we are committed to providing high end quality products and driving operational excellence.

CNC Engraving Equipment

CNC (Computed Numerically Controlled). We are aiming at providing highly accurate engravings. Delicate design which either has 3-D effect or multi-layer on limited space are especially applied.

Vision Statement

We believe customer service is the key ingredient to making a company successful and to provide the best possible care for each and every customer. We believe it should always be simple and seamless for the customer. We believe fair, competitive pricing does not compromise the quality or integrity of our products. We believe in product focus and staying true to our expertise of design in creative pins and coins. We believe a happy company will inspire our craft to its fullest, allowing us to be the best in our industry.

always focusing on details

Process Introduction

■ Imitation Hard Enamel:

Imitation Hard Enamel is a modern substitute for Hard Enamel. This Process provides an outstanding quality finish with reasonable price and a much border range of colours to choose from .

Colours appear much brighter and flashy. Unique to this process , stoning and polishing produce a recognizable flat , shiny surface.

■ Soft Enamel:

This process is another substitute for the real Imitation Enamel and probably the most commonly used. It differs in the colour technique. The colours are not completely filled in the recessed areas and the metal borders are much more visible. This process is also frequently used for items with no colouring and with 3D relief.

■ Acid Etching:

Acid Etching is a process where the design is etched out by acid onto a brass sheet. Unlike Die Struck or Injection, Photo Etched products can be as thin as 0.8mm and it enables us to reproduce very fine details. Silk screen printing and epoxy dome are available upon request.

■ Zinc Alloy die casting :

Die casting products range from small lapel pins to sophisticated emblems and medallions. The production begins by producing a special mold for injection then hot liquid molten alloy is injected into it for a very durable and high-resolution product.

Injection is recommended for products above 2" in length and for lapel pins or key chains that have numerous cut-outs. Zinc alloy injection is a great substitute material to brass to fit your budget.

■ Offset printing :

Offset printing is the perfect alternative when the enamel filled process is not compatible with the design. It enables us to create exact reproduction of your artwork. The printing is done directly on brass, aluminum, or stainless steel and can be plated with gold or nickel plating as an option. An epoxy dome is applied to insure a durable and glossy finish.

Medal

A medal or medallion is, strictly speaking, a small, flat, and round (at times, oval) piece of metal that has been sculpted, molded, cast, struck, stamped, or some way marked with an insignia, portrait, or other artistic rendering. A medal may be awarded to a person or organization as a form of recognition for sporting, military, scientific, academic, or various other achievements.

Military awards and decorations are more precise terms for certain types of state decoration. Medals may also be created for sale to commemorate particular individuals or events, or as works of artistic expression in their own right.

Medal

The Medal of Honor is the United States of America's highest military honor, awarded for personal acts of valor above and beyond the call of duty. The medal is awarded by the President of the United States in the name of the U.S. Congress to U.S. military personnel only.

There are three versions of the medal, one for the Army, one for the Navy, and one for the Air Force. Personnel of the Marine Corps and Coast Guard receive the Navy version. US awards including the Medal of Honor do not have post-nominal titles and while there is no official abbreviation, the most common abbreviations are "MCH" and "MH".

Necklace

A necklace is an article of jewellery which is worn around the neck. Necklaces are frequently formed from a metal jewellery chain. Others are woven or manufactured from cloth using string or twine. Others are woven or manufactured from cloth using string or twine.

Common features of necklaces include colorful stones (particularly gemstones or jewels), wood (usually carved or polished), art glass, feathers, shells, beads or corals – a hugely wide variety of other adornments have also been used. If a necklace includes a primary hanging feature, it is called a pendant; if the pendant is itself a small container, it is called a locket.
