|-----------------------|------------------------------------|
| Item                  | 5inch 480x854 vertical display     |
| Model No              | PV05002TD40C                       |
| Resolution            | 480x854                            |
| Outline Dimension     | 66.40(W)x120.05(H)x2.06(T)         |
| Active Area(mm)       | 61.56(W)x109.53(H)                 |
| Interface             | 3 wire SPI +RGB 24bit              |
| Brightness            | 430nits                            |
| Viewing Angle         | All                                |
| Driver IC             | ST7701S                            |
| LED life              | 30000h                             |
| Display Mode          | TN / Transmissive / Normally Black |
| PIN                   | 40                                 |
| Operating Temperature | -20℃~70℃                           |
| Storage Temperature   | -30℃~80℃                           |
| Touchscreen           | Can custom capacitive touchscreen  |

|                                        |         |
|----------------------------------------|---------|
| 英文                                     | 中文      |
| 480x854                                | 480x854 |
| IPS / Free / Full / Wide viewing angle | 全视角     |
| Can custom capacitive touchscreen      | 可定制电容触摸 |
