This product may contain plastic package which must be removed and kept away form children.

Handle with care, avoid damp, Avoid exposure, and prohibit the soaking in the water.

Cleaning instructions

Our product manufactured with the utmost care and attention; a material whose principles were recorded by Maria Montessori. To preserve your investment, if your materials require cleaning, it is important that you carefully follow the instructions noted below.

Bead Material:

Depending on the climatic conditions, copper can oxidize over time. The light brown oxidation is not harmful however, the copper-green, which occurs with severe oxidation, can be. If this occurs, we advise you to clean the beads using the following method: Place the beads in a lingerie-type net bag. Lay as flat as possible in the top rack of your automatic dishwasher. Set it on the 'normal' cycle, add your regular dishwasher detergent and let it go.

After the cycle is finished, remove the beads and lay them out on a dish towel to dry for a few hours. Your bead material will be safe, clean, and the oxidation will be gone.

Bells Sets:

The bells are made of chrome-plated iron and are cleaned best with a cleaning solution made specially for chrome . the same cleaning solution for use on cars and bikes. Do not use any other type of polish, as this can damage the chrome layer.

Wood . Painted and Unpainted:

Wooden products should be cleaned with a moist cloth and gentle soap. Do not use abrasive solvents. Dry the products thoroughly after cleaning and before storing. Never clean the product with lots of water or immerse it in water. The wood can absorb the water and can swell, damage, discolour and application problems can occur.

Plastics and Plastic Cards:

These can be cleaned with a moist cloth and gentle soap.

Do not use solvents or other volatile products. Dry the products thoroughly after cleaning, and before storing. Some plastics can become statically charged and therefore attract dirt and dust.

Soaking the products in water neutralizes the static charge.

Paper cards:

These can be cleaned with a little moist cloth. Never clean the product with lots of water or immerse it in water.

Textiles:

Remove the textile from the article and clean it like cotton. It is recommended to hand wash using a gentle soap and lay flat to dry. Machine cleaning is not recommended!
