

AIRROBO P20

Gyroscope robot vaccum

Ultimate Strong Power | 2 Ways of Control | Relentless Long Runtime | Obstacle Avoidance

Key Specs	Size	320*320*78mm
	Weight	2.84kg
	Color	Black
	Manufacturer type	
	UPC	797442160484
	EAN	6931705002379
	Power	35W
	Adapter specification	19V
	Operating voltage / power consumption	14.4V
	Battery Type	Lithium Ion
	Battery capacity	2600mAH, 18650
	Dust box capacity	600ml
	Noise	MAX: 69dB POWERFUL: 65dB STANDARD: 59dB QUIET: 53dB
	Filter Type	2-layer washable HEPA filter
	Cleaning mode	Auto clean, Spot clean, Edge clean, and Manual clean.
	Cleaning efficiency	99.20%
	Suction	MAX: 2800Pa (only applied in Spot&Sprial Cleaning modes) POWERFUL:2000Pa STANDARD: 1500Pa QUIET: 800Pa
	Obstacle / climbing ability	20 mm (vertical obstacle crossing), ≤ 15 ° steady climbing
	Filter	HEPA double screen washable
	Fan	Nidec brushless motor
	Remote control range	6 meters
	Applicable area	Hard Floor, Low Pile Carpet, Wood Floor, Tile Floor
	Charging time	6 Hours
	Working hours	Hard-Surface Floor: Powerful-73mins Standard-92mins Quiet-164mins Wilton Carpet:Powerful-75mins Standard-86mins
	Applicable ground	Ceramic tile, marble, wood floor, short hair carpet
	HS code (recommended)	
	Package size & weight	450*348*114mm&3.83 kg
	Carton box size & weight	46.5*37*37cm&12.4kg
	Pallet Qty	
	Highest Cleaning Efficiency*	The cleaning effect always speaks for itself. Coming with Scraper™ Technology designed for ultimate dust extermination, the P20's floating scraper strip allows the suction inlet to be a perfect fit for uneven floors, deeply cleaning even the fine dust from tile gaps. Worry about the scratch? Its stable rolling brush housing and floor-protecting cushions make sure they won't hurt the floors while cleaning. No loss of suction. We make sure the air path inside of the robot is completely sealed, so you don't have to deal with dust spill or highly frequent maintenance. Scraper™ Technology No loss of suction

Features	Surprisingly Easier to Use	All robots should be as beginner-friendly as P20. With the proprietary AIRROBO app, you get to enjoy blazing-fast connection to network in just 7 seconds within 3 steps - turn on device, add device, and enter a Wi-Fi network* - which is 50% or above faster than the comparables. Once connected, you get to control the P20 via app anytime, anywhere. Airrobo Imageturn on deviceadd deviceand enter a Wi-Fi network All robots should be as beginner-friendly as P20. The signal sending and receiving radius between a router and the P20 is up to 20 meters, which is a guarantee of stable cleaning performance in a large and complex area. No more robot parking itself in an unobtrusive corner and waiting for your rescue due to network connection issue. Smarter obstacle avoidance and fall prevention. Packed with the finest cliff sensors, IR anti-collision sensors and more robust algorithms, the P20 is now streets ahead, to intelligently handle complex scenarios such as around furniture legs*, at stairway
	Aesthetically Iconic at a Glance.	More than just a robot. The masterpiece polished with matte texture and diamond pattern is tailored by a top industrial design team in Europe. Not only it's smudge free, but also the flowing diamond luster manifests the concept of modernism and functionalism. Combining aesthetics, innovation and practicality - the P20 integrates into all kinds of interior decoration styles.
	Remote/App Control	* With the proprietary AIRROBO app, you get to enjoy blazing-fast connection to network in just 7 seconds within 3 steps - turn on device, add device, and enter a Wi-Fi network* - which is 50% or above faster than the comparables. Once connected, you get to control the P20 via the app anytime, anywhere.
	For Your Daily Home Clean	The AIRROBO app expands the four suction levels and 4 cleaning modes to feature Deep Cleaning Speed and Fast Cleaning Speed options - a wide variety of rooms, floors, and waste types can be all properly solved. *120 minutes of runtime: The P20 Robot Vacuum can clean up to 120 minutes (up to1500 sqft of space) in quiet mode on a single charge, when the battery is low, it will automatically return to the charging dock to charge
