### Package Contents

1. Wireless charger
2. Adapter
3. Power cord
4. Ceramic cup
5. Ceramic cup cover

### Important Safeguards

1. Do not disassemble or modify this product yourself.
2. Keep the charger and receiver away from water and other liquids.
3. To clean the charger, make sure that no power is plugged in.
4. The ambient temperature is maintained at 0-45 ° C
5. It is forbidden to place metal materials such as coins and keys or magnetic materials such as bank cards on the charger, which will affect normal work.
6. The cups can only be hand washed, not for microwave/dishwasher/oven.

### This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### Wireless mug warmer instructions

After power-on, place the matching ceramics mug in the center of the base.

### Wireless charger instructions

Place the phone in the middle of the wireless charger and the breathing light flashes to the charging state.

### Specifications

Name: Wireless Charger  
Input: 12V/1.5A  
Charging output: 5V/1A , 9V/1.2A ,12V/1.5A  
Transmission distance: less than 6mm  
Charging efficiency: about 80%

LED indicator	Phenomenon description
The light flashes three times	The wireless charger is turned on
The light is not bright	Standby mode
In the state of breathing light	Power transmission
Flashing lights	The location is not in place or security is activated

#### Applicable equipment

1. Built-in wireless charging receiver (iphone8, iphoneX, Samsung S6, etc.),
2. Equipment with a protective cover for the receiving device (iphone7 series, etc.)

Note: These receivers must comply with the WPCQi standard for compatibility  
Note: The wireless charger is equipped with a "wireless charging and heating adaptive switch", which can effectively prevent metal objects or mobile phones from being heated and further prevent damage to the mobile phone or burn the user, and the heat preservation cup can be automatically switched to Heating function.

### Specifications

Name: Wireless Charger  
Heating power : 18W  
CUP CAPACITY: ABOUT 350ML  
Keep warm: about 50°C / 122°F (more suitable for human drinking water )  
Material: reinforced porcelain  
Heating method: wireless induction heating

LED indicator	Phenomenon description
The light flashes three times	The mug warmer is turned on
The light is not bright	Standby mode / not powered on / not used for more than 8 hours
In the state of breathing light	Heating / charging
Flashing lights	The location is not in place or security is activated

Note: Entering standby mode after 8 hours of heat preservation.  
Note: The bottom of the mug is made of special materials. The mug is placed on the base and heated by electromagnetic induction. The ordinary cup is not compatible and cannot be heated.

### Care and Cleaning

1. Wipe the adapter, data cable, and charging stand with a rag or paper towel. Never enter the water.
2. Please clean the cup manually, do not use dishwasher.
3. The cup can be dried and disinfected in 150°C / 302°F , but it can't be placed in a microwave oven or heated in the oven.
