2. Comparative analysis of 100% biodegradable /compostable phone case and common case

Comparative subject	material
100% fully Biodegradable & Compostable Cases	Really Plastic-free
Common cases (TPU, PC, liquid silicone, PU and so on)	Made from full plastic or part plastic
Comparative subject	Degradation In the circumstance of industrial composting plants
100% fully Biodegradable & Compostable Cases	Can be completely degraded within one year, to be specific, it takes 3-6months , does not cause any pollution and harmful substances.
Common cases (TPU, PC, liquid silicone, PU and so on)	Can be degraded into microplastics, methylbenzene Toluene and other harmful substances, by recycling, these harmful substances will harm human.
Comparative subject	Price (from high to low)
Types of cases	Leather case > Real Wooden case > liquid silicone case > 100% full bio-case > TPU case
