SS-2: Measure the mesh openings of 316L stainless steel security screen in one inch.

PRODUCT SPECIFICATION

stainless steel security screen with power coated layer offers perfect corrosion resistance.

The detail about mesh openings of gray 316 stainless steel security screen.

Product name:	stainless steel security screen.
Weave type:	plain weave.
Material:	stainless steel wire 201.304.304L,316.316L
Surface treatment:	powder coated, or PVC coated(matte plastic spraying)
Color:	Black,silver gray,white and earthy yellow
Wire diameter:	0.8 mm. (0.6 mm - 1.2 mm is also available at your requests.)
Mesh opening:	11 mesh × 11 mesh. (Besides 10 mesh × 10 mesh, 12 mesh × 12 mesh and 14 mesh × 14 mesh, non-standard mesh openings are also available at customers' requests.)
Length:	1500 mm, 2000 mm, 2400 mm, 3000 mm.
Width:	750 mm, 900 mm, 1000 mm, 1200 mm, 1500 mm.
Note:	Special dimensions are also available according to your requirements.

Guarantee:	ten years.
Package:	5 pieces in one carton box, then 10 carton boxes in one wooden case; or 25/50 pieces per wooden case.

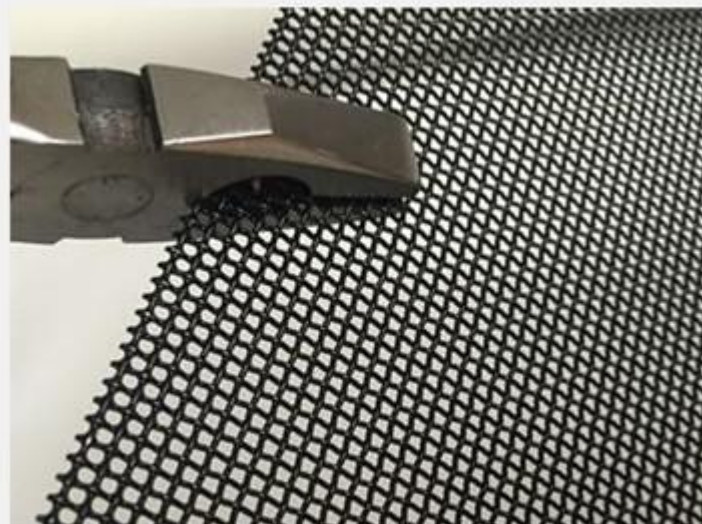

PRODUCT FEATURE

Benefits and Features:

- Black coated stainless steel bulletproof security screen resist from corrosion.
- Quality meets Australia standard, pass knife test, impact test, and jemmy attack test.
- Very easily to install into the Aluminium profile with flat and straight surface.
- Equal wire tensile strength, wire diameter and mesh size, keeping air circulation & high quality day-lighting.
- Saves energy by reducing need for air conditioning.
- Able to block an average of 60% of harmful UV rays.
- Protection and peace of mind.

Its material stainless steel wire offers good toughness that can resist damage from knife.

stainless steel security screen with high strength can withstand damage from pliers.

Use a hammer to test the hardness of stainless steel security screen.

stainless steel security screen can be no deformation through saw test.

Comparision between 304 secuirty mesh and 316L security mesh

Because 304 grade security mesh screen with 0.9 mm wire is thicker than [0.8 mm 316 mesh](#). So, 304 stainless steel security screen is stronger and wear resistance than 316, maintaining the corrosion resistant qualities, but 304 grade stainless steel is less brittle than 316.

304 security screening is ideal for secure window/door screen and safe swimming pool fence.

High strength 304 stainless security screen with elegant appearance is mainly used as [security windows](#) and door for guarding your house and office, having the anti-theft, anti-insect and ventilation performance.
