

RC-29 Remote Controller

Seamless Protection

RC-29 wireless Remote Controller offers users more convenience and flexibility by extending control of their alarm system to longer distances before entering the home or after exiting. Use the RC-29 to easily arm, disarm, and home arm your alarm system at your fingertips. When under an emergency situation, you can also activate the Panic Alert button with a simple press of button. Functionality and peace of mind all packaged into a compact remote control.

RC-29 uses reliable RF technology and can be integrated into Climax's security system. The wireless key fob is designed to fit on a key chain, in a pocket or purse, or on your bedside table - anywhere you would like instant wireless control of your alarm system.

- Extremely convenient and portable keychain design
- Four buttons:
Arm / Disarm / Home / Panic
- Communicates with reliable RF technology
