01 Company Introduction

Xinxiang Zhongwen Paper Industry was established in 2010, focusing on paper cutting and sales for more than ten years. We have a factory area of over 8000 square meters, more than 100 employees, nearly 30 professional production equipment, and an annual output of 9000 tons. Our main products include thermal paper, carbon free cash register paper, computer printing paper, and self-adhesive labels.

Zhongwen has always adhered to the principle of "quality first, integrity-based", insisting on providing customers with cost-effective products that exceed expectations, and achieving stable and fast product delivery. At present, our products have been exported to multiple countries and regions around the world, and we are continuously expanding our close cooperation with global customers to achieve higher brand recognition.

Partial silhouette of the factory

Our factory is committed to providing excellent customer service. We are well aware of the importance of reliability and efficiency in today's fast-paced market, which is why we strive to meet and exceed customer expectations.

Factory storage capacity

Our factory has sufficient storage space to ensure timely supply of raw materials and semi-finished products, avoiding production delays caused by material shortages. In addition, a reasonable warehouse layout and the use of automation equipment can improve the efficiency of material access, reduce waiting time on the production line, and thus improve production efficiency.

Factory delivery capacity

Our factory has excellent delivery capabilities and can meet the customer's demand for product quantity and delivery time. We have advanced production equipment and efficient production processes, which can ensure high quality and large-scale production of products. On the premise of timely delivery, and ensuring that product quality is not affected.

02 Product Introduction

Our main products include thermal sensitive paper, labels, carbonless paper, processing base paper, paper bags, and other paper consumables and printing processes.

Suitable for thermal testing instruments such as commercial supermarket cash registers, bank ATMs, medical instrument records, catering, hotels, logistics labels, railway transportation records, traffic police penalty forms, cinema receipts, etc.

03 Printing ability

Precision and quality: From vivid color reproduction to complex details, our printing technology ensures that every printing operation exceeds customer expectations.

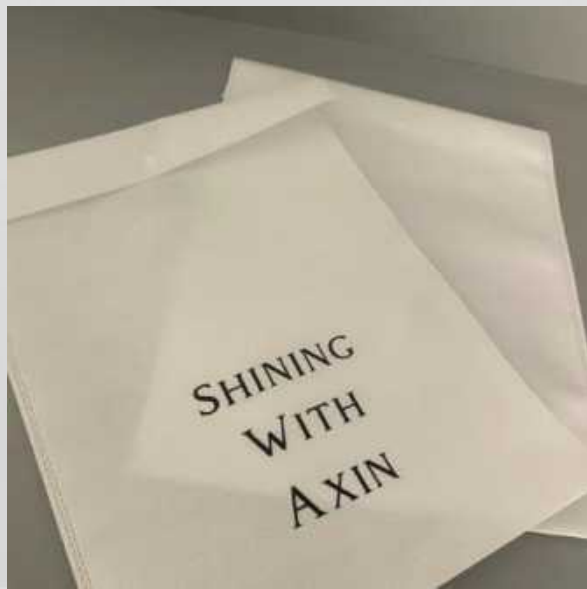

Multifunctionality and Customization: Whether you need large-scale printing or personalized promotional materials, our multifunctional printing capabilities enable us to meet a wide range of printing needs. We focus on customization, allowing you to create unique and eye-catching prints that resonate with your target audience.

Widely applicable materials: non-woven fabric, self-adhesive, copperplate paper, copy paper, various packaging materials, etc., to meet the diverse needs of customers.

Printed products - stickers

The finished product of self-adhesive printing can be used for bottle labels, industrial labels, anti-counterfeiting labels, cosmetics labels, food labels, etc.

Printed finished product - non-woven fabric

Non woven printed products can be used for lining bags, storage bags, shopping bags, packaging substrates, etc.

Printed products - plastic film

Plastic film printing products can be used for beverage packaging, food packaging, food preservation bags, shopping bags, facial mask bags, etc.

Printed products - copperplate paper

Copperplate paper printed products are used for calendars, hang tags, picture albums, art books, etc.

04 Choose us

Xinxiang Zhongwen Paper Industry has always adhered to the principle of "quality first, integrity-based", with 13 years of domestic and international sales experience, creating a perfect pre-sales, in sales, and after-sales team and service, establishing close cooperative relationships with customers, and providing customers with a pleasant cooperation experience.

Advanced production equipment and automation technology can significantly reduce production costs, improve production efficiency, and provide more competitive prices. Adopting standardized production processes and strict quality control makes product quality more reliable and meets market demand.
