- Telephone adapter with RJ11 cable
- Application for UK and US market
- Compact package, easy installation
- OEM or ODM orders welcome
- UK plug and jack with US jack (new type)

Housing Materials	ABS-HB or 94V0
Female Pin	Phosphor bronze with Nickel plated
Pillar	62% copper
Wire conductor	1061-26AWG-7x0.16mm
Gold plate	3 μ "
Plugging life	over 1000 times
Contacting Resistance	less than 0.5 Ω
Insulation Resistance	less than 100M Ω (DC 500V, continue 1min.)
Dielectric withstanding voltage	AC 1.0KV (50Hz, continue 1min.),creepage current \leq 2.0mA, and it break or asymmetry.

- rj11 jack adapter,telephone connection box
-
- ADSL:ADSL connections use existing copper telephone lines to transmit data to and from the ISP. A special Internet service which is available in many areas.
-
- ADSL splitters/filters is an electronic device that isolates the ADSL and voice bands. An ADSL Line Filter is required whenever you connect a computer to the internet using Broadband over a standard telephone line. The filters/splitter divide the signals on the telephone line between the high pitched computer modem sounds and the lower pitched human voices.
