

Hesheng Longgang
Technology

Specification of Monocrystalline Germanium ingot

Electrical Resistivity	5-45 Ohm-cm
Crystal Structure	Monocrystalline (doping Antimony)
Purity	6N
Density	5.35 G/CM3
Melting Point	937.4 °C
Boiling Point	2930 °C
Size	Diameter:100-150mm Length >150mm
Net Weight	The actual size is close to the customer's requirements
