

Feature

This type of push-pull mortise lock adopts a key less locking design.It could be locked with a knob from inside and unlocked with a coin from outside.Locking status could be displayed on the outer panel.When there is a state of emergency and the door is locked,it could be quickly unlocked from outside.The lock body shell is made of POM and the handle is made of aluminum alloy to ensure the firmness of the lock.The bolt is made of plastic POM and zinc alloy which reduces the noise and achieves a better mute effect.The surface treatment adopts Japanese advanced technology.Variou tests are carried out in accordance with Japanese JIS standards to ensure the durability of the lock both from the appearance and structure.
